Rakesh Yadav

QA Engineer

With over 11 years of dedicated experience in the e-commerce industry as a QA Engineer, my expertise lies in test management tools and Agile methodologies. I possess proficiency in SQL, test case design, and defect tracking. My knowledge extends to both Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC). I am deeply committed to fostering collaboration with cross-functional teams, meticulously documenting test plans, and upholding software quality standards. I am currently in pursuit of a challenging role that will enable me to apply my technical skills and make valuable contributions to software development endeavors.

WORK EXPERIENCE

QA Engineer
Catch.com.au

07/2012 - 08/2023 *Australia*
Catch.com.au is part of the Wesfarmers Group and is a shopping platform.

Achievements/Tasks

- Collaborated closely with diverse departments to create inventive solutions for functionality challenges, while also orchestrating seamless coordination among multiple teams to resolve issues and enhance the efficiency of software testing processes.
- Lead initiatives spanning all testing phases, establishing, and executing test processes and strategies tailored to the development methodology, particularly for medium and complex test demands. Also, develop and implement test assessment strategies aligned with project requirements.
- Ensured the test environment was correctly set up with relevant data and configurations, troubleshooting environment-related issues.
- Conducting and participating in different Types of Testing - Integration, System, Functional, Performance, Regression, Sanity, Smoke and User Acceptance Testing (UAT).
- Identified, documented, and tracked software defects using JIRA, providing detailed defect reports to development teams.
- Contributed to root cause analysis for failure and errors and Achieved targets through effective communication and maintaining high productivity levels.
- Offered testing proficiency and guidance to fellow team members in crafting automation testing strategies that maximize coverage and benefits while minimizing the need for extensive maintenance and support.
- Actively participated in meetings to discuss testing processes, share insights, and suggest workflow improvements.
- Conducted ad hoc testing to validate changes or new features and provide rapid feedback to the development team.

EDUCATION

Bachelor's Degree
Adarsha College

04/2007 *India*

SKILLS

SQL, Postman Jira, Zephyr, TestRail, Confluence

GitHub, Docker, and Jenkins CI/CD Pipelines

Automation and Manual Testing Salesforce

Agile and Scrum methodologies SDLC and STLC

Backend testing framework

E-commerce Domain Knowledge

PROJECTS

KMART (01/2023 - 07/2023)
- Integrated Kmart stock data into High Jump WMS and completed the project on schedule, within budget, and with zero production issues.

Autonomous mobile robots - Geek (08/2022 - 01/2023)

TRAINING/COURSES

Agile and Scrum Fundamentals with JIRA

Postman and API Testing

Selenium WebDriver with PYTHON

SQL
